

Disability questions you can ask ANY candidate

- With federal Medicaid cuts about to hit state budgets, what will you do to guarantee seniors and people with disabilities can continue to get the help they need to stay in their own homes (and out of expensive Medicaid funded institutions)?
- Every year the special education reimbursement is not enough to cover actual costs. What will you do to make sure the legislature keeps its promises and funding is guaranteed for these students?
- People with disabilities who want to work are being told they must wait at least a year for help. What will you do to make sure that workers with disabilities can use the Division of Vocational Rehabilitation in real time to get the support they need to find and keep a job?
- Right now, people with disabilities can't get the care they need to stay in their homes outside of Medicaid. That means they are required to be poor forever just to have the help they need to survive. What will you do to make sure people with disabilities can earn and save more without losing the health and home and community based long term care services they need?
- Will you consult with disability organizations and advocates when you are developing policies? How will you solicit ideas, feedback, and make changes to proposals that impact people with disabilities?
- How do you plan to make sure decisions are driven by the people who must live and navigate the programs, that decisions make it easier for them not harder, and that decisions are going to result in outcomes people with disabilities want (greater independence, inclusion, integration)?
